

"AN EXCELLENT USE OF POLY-MVA IS SUPPORTING QUALITY OF LIFE." — RUDY FALK, MD

POLY-MVA®

THE BINDING OF PALLADIUM,
A RARE TRACE MINERAL, WITH
ALPHA LIPOIC ACID, A POWERFUL
ANTIOXIDANT, DRAMATICALLY
INCREASES NUTRIENT ABSORPTION
AT THE CELLULAR LEVEL AND
THROUGHOUT THE BODY
- A BREAKTHROUGH THAT
DISTINGUISHES POLY-MVA® FROM
ANY OTHER SUPPLEMENT!

A REMARKABLE NEW SUPPLEMENT CATEGORY

Poly-MVA® is a uniquely formulated combination of minerals, vitamins and amino acids designed to support cellular energy production and promote overall health. Poly-MVA® also replaces specific nutrients that may be depleted during certain therapies.

A patented dietary supplement with over 15 years of clinical laboratory research and testing, Poly-MVA® is a revolutionary product and the first in a remarkable new category of supplement called lipoic acid palladium complexes (LAPd).™

BENEFITS OF POLY-MVA®:

- Provides nutritional support to those with compromised immune systems*
- Promotes overall health by replenishing nutrients that may be depleted during certain therapies*
- Provides superior antioxidant and free radical protection*
- Offers fast acting, immediate absorption for quick results*
- Supports energy production at the cellular level*
- Enhances quality of life*

"POLY-MVA IS A GREAT TONIC FOR EVERYONE!" —GEORGE ZABRECKY, MD

THE NEXT ADVANCE IN NUTRITION

Poly-MVA® is formulated by Dr. Merrill Garnett, who for over 40 years has conducted research on the actions of DNA within cells. His studies focus on the intersection between biochemistry, physics and what Dr. Garnett calls "electrogenetics" - the action of electrons and their energy transfer mechanism.

Poly-MVA® is created through an innovative, patented, proprietary process whereby palladium (a rare mineral) is chemical bound to alpha lipoic acid, a powerful anti-oxidant involved in cellular protection. When alpha lipoic acid is connected to an electrically charged metal substrate (palladium) and joined with various vitamins, the resulting complex becomes totally soluble in both water and fat. This dramatically increases the body's absorption of alpha lipoic acid at the cellular level and throughout the entire body. With Vitamins B1, B2 and B12, specific trace minerals and amino acids, this unique complex and formulation creates a synergy, action and function not

found in any other dietary supplement. It is designed to assist the electron transport chain of the cell via the mitochondria and the production of ATP, the cell's energy source.

NUTRITIONAL SUPPORT FOR OPTIMUM HEALTH EVEN DURING CERTAIN THERAPIES*

Many people undergoing certain therapies may have significant nutritional depletions in both macro and micronutrients, crucial to the healthy functioning of the body. These drug-induced nutrient depletions may further be compounded by lack of adequate nutrition due to poor diet and stressful lifestyles. Without specific nutritional support, the impact of nutrient depletion can worsen over time. Poly-MVA® contains nutrients that may be depleted during certain therapies.. In addition, the nutrients comprised in Poly-MVA® are commonly used to support overall health

and well being.* Many people, including those with compromised immune systems, use Poly-MVA® to improve their quality of life and maintain their nutritional support.

SAFE AND NON-TOXIC

Lipoic acid palladium complexes (LAPd)™ have been extensively tested under laboratory conditions and have been used for more than twelve years as a dietary supplement. Animal toxicology and safety studies indicate that palladium lipoic complex is safe, even when administered at levels 50 times greater than highest recommended use.

FAST-ACTING

Most individuals notice a difference in how they feel within 2-4 weeks. Some individuals have seen positive results (e.g., energy improvement and increase appetite) in a matter of days.

CONTINUING RESEARCH

Case studies have been documented and published on the effects of Poly-MVA® on quality of life and its other benefits.* Further human and animal studies are being performed to support the positive impact of Poly-MVA's role in nutrition and health.
