- SAFELY INHIBITS ANAEROBIC CELLS WHILE SUPPORTING HEALTHY CELLS*
- COMPATIBLE WITH MANY CANCER THERAPIES*
- SUPPORT FOR PAIN-RELATED DISCOMFORT*
- IMPROVES ENERGY AND APPETITE*
- EXTREMELY SAFE*
- ENHANCES QUALITY OF LIFE*

A NEW POWERFUL WEAPON AGAINST CANCER

NOW THERE'S AN INCREDIBLY EFFECTIVE YET NON-TOXIC FORCE IN THE FIGHT AGAINST CANCER IN PETS.

Poly-MVA for Pets® is the first in a new class of nutraceuticals known as Palladium Lipoic Complexes.® Numerous veterinarians have found Poly-MVA for Pets® to be a superior and more effective nutritional support for animals undergoing cancer therapy.*

THE NEXT ADVANCE IN NUTRITION™

Poly-MVA for Pets® is a remarkable nutraceutical, powerful enough for nutritional support in cancer therapy - yet safe and gentle enough to use with elderly pets in need of increased energy and vitality. The key to the remarkable properties of **Poly-MVA for Pets®** lies in its active ingredient, the patented Palladium Lipoic Complex,™ a unique chemical polymer that enhances cellular function in healthy cells, while interfering with the function and reproduction of abnormal cells. In addition to its effectiveness with cancer support, many years of clinical research and testing by laboratories and veterinarians have shown the following benefits for **Poly-MVA for Pets®**:

■ SUPPORTS NORMAL & HEALTHY CELL GROWTH AND IMMUNE SYSTEM FUNCTION

Significant nutritional support has also been reported in many cases. Because **Poly-MVA for Pets®** has shown in studies to effectively disrupt the functioning and energy source of anaerobic/abnormal cells, it provides superior cellular protection. In addition to supporting the function of healthy cells, **Poly-MVA for Pets®** enhances immune function, further stimulating optimum health.

■ AN INTEGRATIVE APPROACH

The best possible treatment plan for your pet will be individually prepared by your veterinarian, and may make use of several different treatment modalities. **Poly-MVA for Pets®** will support and can be used with most treatment plans, and has been shown to be an effective support when used as a stand alone supplement. Ask your veterinarian if **Poly-MVA for Pets®** is a beneficial option for your pet's situation.

■ QUICK RESULTS, IMPROVED APPETITE & INCREASED ENERGY

The majority of veterinarians and animal owners report a dramatic increase in appetite, alertness, and energy in pets using **Poly-MVA for Pets®**, most within just a few days of initial use.

■ PROVIDES SUPPORT FOR PAIN RELATED DISCOMFORT*

Poly-MVA for Pets® is frequently reported to show significant support with pain-related discomfort in pets. Numerous animal owners have seen extraordinary improvements in mobility in pets having joint-related concerns.

■ EXTRAORDINARILY SAFE

Toxicity and safety tests have shown that **Poly-MVA for Pets®** is very safe. Animals given acute dosages 50 times higher than the highest recommended dosage experienced no side effects or other negative symptoms.

■ ENHANCES YOUR PET'S QUALITY OF LIFE

By reducing pain-related discomfort, increasing appetite and vitality, and protecting healthy cells and enhancing their energy production, your pet can live a longer, happier, healthier life with the help of **Poly-MVA for Pets®**.

THE CLINICAL FUNCTION OF POLY-MVA FOR PETS®

Poly-MVA for Pets® is the first product to come out of the new field of electrogenetics, which studies and describes the energy requirements, energy exchanges, and electrical communication that allow DNA signaling and communication in our cells. While an in-depth explanation involves interactions that bridge the fields of chemistry, physics and biology, the mechanism of **Poly-MVA for Pets®** can also be explained in more common physiological terms.

Poly-MVA for Pets® maintains and enhances the function of mitochondria, the main source of energy within cells. In healthy cells using aerobic respiration, **Poly-MVA for Pets®** not only protects these cells from damage, but enhances their function and action. The clinical effects of **Poly-MVA for Pets®** have been proven in studies with hundreds of laboratory animals as well as in veterinary oncology hospitals and health centers nationwide.
